## Professional Summary

A motivated and skilled Flutter and Node.js developer with hands-on experience in building modern mobile applications and backend systems. Experienced in working with GetX and Cubit for state management, Firebase and real-time systems using Socket.io. Passionate about creating clean, efficient, and scalable applications. Seeking remote opportunities to grow and contribute to impactful projects.

## Technical Skills

- Flutter (State Management: GetX, Cubit – Animations – REST API Integration – Firebase Auth – Multi-language support – Dark/Light Mode – Push Notifications)
- Node.js (Express.js – RESTful APIs – JWT Authentication – MongoDB – WebSocket – Real-time Notifications – Socket.io)
- Tools: Git/GitHub – Postman – VSCode – Figma (Basic)
- Languages: English (Good)

## Work Experience

- ◆ Flutter Developer – StepAlpha (6 months)
- Developed “Affeh” (matchmaking and relationship app)
- Contributed to a hospital management system
- Handled UI/UX implementation, API integration, and real-time features

## Personal Projects

- Social Media App with Recommendation System
- Real-time Chat App using Node.js
- Firebase Chat Application
- E-Commerce Application
